

COMPANY: e2E SERVICES LTD.
JOB REF: RES.037
TYPE OF ROLE: PERMANENT
CLIENT LOCATIONS: Corsham and Welwyn Garden City as required

Our Company

e2E has been at the forefront of innovation in the space sector, specialising in satellite communications, for two decades, offering to all our world-wide stakeholders unrivalled expertise to design, develop and operate state-of-the-art solutions and systems. Our portfolio of consultancy services and technology know-how covers the entire spectrum of any satellite communication project, from market opportunity sizing and end-user requirements down to ground network development and operations. To both commercial and defence related domains, we also offer unique modular and agile technology to enable a more user-friendly and accessible use of satellite communication resources.

Innovation and ingenuity are the guiding principles of anything we do for our customers. Working with e2E requires a high level of dedication and personal motivation, commitment and a drive to continually seek to strive to improve – and the results consistently achieved over the years, at both personal and team levels, are outstanding and make e2E a great place to work.

Job Description

Our team is involved in establishing the requirements and assuring the delivery of the UK's next generation of military satellite system. We are applying industry best practice to guide the Ministry of Defence in the procurement of a satellite capability that will support our military personnel in the most challenging of environments.

We have a opportunities for Junior and Senior Systems Engineers to join the the e2E team supporting the MOD in the procurement of their next generation of satellite communications. The roles will play a key role in supporting the MOD in defining, planning and implementing the Test, Evaluation and Acceptance plans of the project deliverables as they are integrated into the overall ecosystem of satellite communications.

Key Responsibilities

- Coordinate the Acceptance support for the projects, including the production of Integrated Test, Evaluation and Acceptance (ITEA) Plans, Verification Requirements Matrix and associated acceptance artefacts.
- Ensure that the projects acceptance approach/plan is coherent with the wider programme.
- Provide acceptance and requirements advice and guidance to the project and represent them on ITEA related matters.
- Provide acceptance support to the creation of Business Cases, Review Notes and Information Notes.
- Ensure that the Statement of Requirements (SoRs) have measurable and testable Measures of Performance (MoPs).
- Ensure acceptance Verification & Validation (V&V) activities at every level are appropriate and coherent with the ITEAP; and that decisions at the lower levels, whilst acceptable individually, do not have a cumulative effect that together compromises delivery of the required capability.
- Lead on the evaluation of ITN responses for assurance and acceptance related questions.
- Identify and manage ITEA related RAIDO.

Skills, Character and Experience

Essential:

- Knowledge and experience of Requirements and Acceptance Management.
- Experience of supporting the evaluation and acceptance of satellite or ICT capability delivery programmes throughout all phases of the project lifecycle.
- An understanding of assurance processes.
- Excellent written / verbal communication and information management skills.
- Ability to deal with ambiguity and operate effectively and efficiently in high tempo, dynamic environment.
- Ability to effectively communicate complex information and influence stakeholders.

Desirable:

Satellite Communications – Test, Evaluation and Acceptance Engineer

- Knowledge and experience of Requirements and Acceptance Management based on MoD's Knowledge in Defence (KiD) framework.
- Experience of leading acceptance support to MOD capability delivery programmes.
- An understanding of MOD Operational CIS.
- Experience and knowledge of SATCOM capabilities.
- Manipulation, presentation management of requirements and acceptance data and information in MS Excel and SharePoint.
- Understanding of the MOD's procurement processes and procedures.

Salary

- Attractive compensation package dependent on skills/experience plus a growing list of Company benefits
- By submitting your CV/application you are consenting to e2E Group using and storing information about you for monitoring purposes relating to your application of future employment. This information will only be used by e2E Group.

e2E Group is committed to achieving workforce diversity and welcome all applications irrespective of social and cultural background, age gender, disability, sexual orientation or religious belief.
